Healthy Living Pharmacy

The impact of Healthy Living Pharmacies

1 Healthy Living Pharmacies improve the public's health and drive improvements in service quality and innovation

2 People walking into a Healthy Living Pharmacy are twice as likely to set a quit date for smoking and then quit than if they walked into a non-Healthy Living Pharmacy

3 Healthy Living Pharmacies consistently deliver high-quality public health services – NHS Health Checks, weight management, sexual health, etc

4 Healthy Living Pharmacies reach out to local communities (universities, businesses, schools, community centres, etc) with health improvement advice and services

99%
of people are comfortable and happy with the service provided by Healthy Living Pharmacies

98%
of people would recommend Healthy Living Pharmacies to their families and friends

60%
of people would make an appointment with their GPs if the health improvement service was not available at a Healthy Living Pharmacy

20%
of people would not have gone to another provider (ie, they would have received no support for improving their health)

Long Term Conditions – Health promotion zone

Community Pharmacy

New Medicines Service (NMS)

For specific conditions where new medicines are started (e.g. asthma, COPD, type 2 diabetes, hypertension and those started on blood thinning medicines), community pharmacists can follow up patients using the new medicines service

Advanced Smoking Cessation Service (Transfer of Care)

In July 2019, PSNC, NHS England and NHS Improvement (NHSE&I) and the Department of Health and Social Care (DHSC) agreed a [five-year deal for community pharmacies](#), which included piloting a service to take stop smoking referrals from secondary care and then if successful, in Year 3 (2021/22) to commission such a service nationally.

COPD – Chronic Obstructive Pulmonary Disease
