

The Smokefree Great Britain Survey 2020¹

Public Opinion in London

In 2018, 13.9% of people in London continued to smoke.² Smoking killed 22,306 people in London from 2016-18³ and remains the leading cause of preventable illness and premature death in England.⁴

In 2020, London supported Government action to tackle tobacco

- Around three quarters (75%) of adults in London support activities to limit smoking or think the government could do more
- Only 7% of adults in London think the Government is doing too much (3%) or far too much (3%)
- In London, the proportion of respondents who think the Government could do more to limit smoking has grown substantially from 26% in 2009⁵ to 43% in 2020
- 72% of people in London support the Government's ambition to reduce smoking prevalence to 5% or below (fewer than 1 in 20 people) by 2030 with just 7% opposing

What further action should be taken to tackle tobacco?

A levy on tobacco manufacturers

Adults in London strongly support tobacco manufacturers being required to pay a levy to Government for measures to help smokers quit and prevent young people from taking up smoking. 73% of London support this, with only 6% opposing it.

London support for a tobacco levy or license fee paid by tobacco manufacturers to Government

Increasing the age of sale from 18 to 21

The majority of adults in London support increasing the age of sale for tobacco from 18 to 21, with few opposing it. There is good evidence that raising the age of sale of tobacco to 21 will have a substantial positive impact on public health and save lives.⁶

London's support for increasing the age of sale for tobacco to 21

Pack inserts

Around two thirds (65%) of adults in London support requiring cigarette packs to include inserts with Government information about quitting, compared to 9% who oppose it. Research from Canada, where pack inserts are used, shows they have been effective in promoting quitting,⁷ whilst UK research shows use of such inserts is supported by smokers diverse in age, gender and social grade.⁸

London's support for cigarette packs to include inserts with Government information about quitting

Smoking in cars

Banning smoking in all cars is supported by 62% of adults in London and opposed by just 16%. Smoking in cars results in concentrations of toxins much higher than are normally found elsewhere – up to 11 times higher than you used to find in the average smoky pub.⁹

London support for a ban on smoking in all cars

Tobacco retail licensing

78% of adults in London support the introduction of a licence to sell tobacco which can be removed if retailers are caught more than once selling to underage smokers, with only 4% opposing.

London's support for a tobacco retail register in England

In 2019, public belief in tobacco companies' offers of help was extremely low in London¹⁰

Tobacco manufacturers increasingly claim they want to help people stop smoking and are trying to influence public health policy, for example by offering funding in exchange for relaxing of advertising regulations on new products.¹¹ The public understands the tobacco industry are not to be trusted: only 3% of adults in London agree with the statement: 'I believe tobacco companies when they say they want to help people quit smoking'

London: 'I believe tobacco companies when they say they want to help people quit smoking'

1 All figures, unless otherwise stated, are from YouGov Plc Smokefree Britain Survey 2020. The total sample sizes was 10749 adults in England. The unweighted sample for London was 1509. Fieldwork was undertaken between: 17th February 2020 to 11th March 2020. The survey is carried out online. The figures have been weighted and are representative of all GB adults (aged 18+).
